INTER-OFFICE CORRESPONDENCE

REILLY TAR & CHEMICAL CORPORATION

TO: MR. R. J. BOYLE - INDPLS.

OFFICE: St. Louis Park

NON-RESPONSIVE

DATE: June 6, 1969

SUBJECT: ST. LOUIS PLANT PROPERTY FENCING

✓

Enclosed is a letter received from Mr. E. H. Peterson of the Health Department of the City of St. Louis Park. With reference to the clearing of waste and litter Mr. Peterson specifically referred to the north end of our property and outside of the fence between the fence and the roadway. During the winter it seems that people in the adjacent area, and probably some of those who complained had deposited debris on the outside of the fence and on some occasions immediately inside the fence. In response to a complaint by the citizens, Mr. Peterson called me and discussed both the yard cleanup and the condition of the fence.

Each year, of course, a concentrated effort must be put forth to clean up the yard after the winter snows have melted. The scheduled cleanup had begun when we received the complaint from Mr. Peterson and the outside area was cleaned. As previously planned, the yard was cleaned by May 20th to greet the visiting A.R.E.A. committee.

With regard to Mr. Peterson's understanding that a chain link type fence would be constructed this year to replace the present fence, Mr. Peterson was informed that we were considering the replacement of our present fence with a chain link fence. The fence, however, is becoming quite a topic of complaint from the surrounding citizens. The fence has become a focal point. I have been extremely reluctant to repair the fence as the repair would be very temporary. The task of repairing the fence on any permanent basis, I feel, would cost us considerably more than the installation of an entire new fence.

Yours very truly,

H. L. Finch
